ENGINE OIL RECOMMENDATIONS

Case IH No.1 Engine Oil is recommended for use in your Case IH Engine. Case IH No.1 Engine Oil will lubricate your engine correctly under all operating conditions. If Case IH No. 1 Multi-Viscosity Engine Oil is not available, Case IH No. 1 Single Grade Engine Oil can be used.

If Case IH No.1 Multi-Viscosity or Single Grade Engine Oil is not available, use only oil meeting API engine oil service category CE.

BI96H018

BP97H064

See the chart below for recommended viscosity at ambient air temperature ranges.

NOTE: Do not put Performance Additives or other oil additive products in the engine crankcase. The oil intervals given in this manual are according to tests with Case IH lubricants.

■ Indicates use of an engine oil heater or a jacket water heater is required.

DIESEL FUEL

Use No. 2 diesel fuel in the engine of this machine. The use of other fuels can cause the loss of engine power and high fuel consumption.

In very cold temperatures, a mixture of No. 1 and No. 2 diesel fuels is temporarily permitted. See the following Note.

NOTE: See your fuel dealer for winter fuel requirements in your area. If the temperature of the fuel is below the cloud point (wax appearance point), wax crystals in the fuel will cause the engine to lose power or not start.

The diesel fuel used in this machine must meet the specifications in the chart below or Specification D975-81 of the American Society for Testing and Materials.

Fuel Storage

If you keep fuel in storage for a period of time, you can get foreign material or water in the fuel storage tank. Many engine problems are caused by water in the fuel.

Keep the fuel storage tank outside and keep the fuel as cool as possible. Remove water from the storage container at regular periods of time.

Specifications for Acceptable No. 2 Diesel Fuel

API gravity, minimum	34
Flash Point, Minimum	60x°C (140° F)
Cloud point (wax appearance point), maximum	-20°C (-5°F) See Note above
Pour point, maximum	-26°C (-15°Fx) See Note above
Viscosity, at 38° C (100° F)	
Centistokes	2.0 to 4.3
Saybolt Seconds Universal	32 to 40
Cetane number, minimum	43 (45 to 55 for winter or high altitudes)
Water and sediment, by volume, maximum	0.05 of 1%
Sulfur, by weight, maximum	0.50 of 1%
Copper strip corrosion, maximum	No. 2
Ash, by weight, maximum	0.01 of 1%

SAFETY INFORMATION

SAFETY ALERT SYMBOL

This is the Safety Alert Symbol. When you see this symbol in this manual, be alert to the potential for personal injury.

Follow recommended precautions and safe operating practices.

Understanding Signal Words

A signal word - **WARNING** - is used with the safety-alert symbol.

DANGER, **WARNING**, or **CAUTION** safety labels are located near specific hazards.

NOTE labels are for general information.

DANGER

DANGER IS USED TO INDICATE THE PRESENCE OF A HAZARD WHICH WILL CAUSE SEVERE PERSONAL INJURY OR DEATH IF THE **WARNING** IS IGNORED.

WARNING IS USED TO INDICATE THE PRESENCE OF A HAZARD WHICH CAN CAUSE SEVERE INJURY OR DEATH IF THE **WARNING** IS IGNORED.

CAUTION

CAUTION IS USED TO INDICATE THE PRESENCE OF A HAZARD WHICH WILL OR CAN CAUSE PERSONAL INJURY, OR PROPERTY DAMAGE IF THE **WARNING** IS IGNORED.

NOTE

NOTE is used to notify people of installation, operation, or maintenance information which is important but not hazard related.

General Safety Guidelines

Accidents are caused by failure to follow simple, fundamental safety rules and precautions. Most accidents can be avoided by paying attention, using common sense, and following instructions.

WARNING: *Improper maintenance can be hazardous.*

Read and understand SECTION 1 - SAFETY AND GENERAL INFORMATION before performing any maintenance, service, or repairs.

M622

Study the operator's manual and service manual before starting, operating, maintaining, fueling, or servicing the 686G, 686G XR, and 688G Series 2 Telescopic Handlers.

Keep hands and fingers from between small parts. Wear protective gear such as safety glasses, heavy gloves, and safety shoes.

No unauthorized person should be allowed to operate, service, or maintain this telescopic handler. Do not perform any work on the equipment that is unauthorized.

Read and understand all unit mounted safety labels before starting, operating, maintaining, fueling, or servicing this unit.

WARNING: *Unexpected machine motion or moving parts can cut or crush.*

Shutdown the engine before working on the machine.

M621

Always make sure that the parking brake is set and the engine is shut down before starting any maintenance or service procedures.

Disconnect the negative battery terminal and tag all controls according to OSHA requirements to warn that work is in progress.

Always wear proper safety equipment as required for the job. Consult your supervisor for specific job related safety equipment requirements.

Do not wear rings, watches, jewelry, or loose or hanging apparel, such as ties, torn clothing, scarves, unbuttoned or unzipped jackets, or anything else that could possibly get caught up in moving parts. Long hair must be tied back or otherwise secured.

Keep the maintenance area clean and dry. Remove water or oil slicks immediately.

Be sure all mechanics tools are in good condition. Do not use tools that are extremely worn out, rounded out, mushroomed, or loose. Always wear safety glasses with side shields.
